

TR-RD1G/TR-RD1R

Remote Annunciator

The TR-RD1G is a remote annunciator used to operate and program TRIGA series fire alarm control panels (FACP's).

The remote annunciator connects to the control panel via the RS-485 system bus. When the system is in normal operation and has AC power, the Power LED is lit and all other LEDs are off. The other LEDs turn on as alarms, supervisories, troubles, system silenced and AC power losses occur.

INSTALLATION

The TR-RD1G can be surface or flush mounted. Use the optional trim ring for surface mounts. When flush mounting an electrical box is optional. If using an electrical box, use a 4S, single-gang, or double-gang box.

COMPATIBILITY

The TR-RD1G is compatible with the following Triga Series FACPs:

- TR-2100R / TR-2100B
- TR-2100ECSR / TR-2100ECSB
- TR-R2100R / TR-R2100B
