

Indoor Strobes, and Horn Strobes for Ceiling Applications

The Triga audible visible notification products offer the most versatile and easy-to-use product line of horns, strobes, and horn strobes in the industry. This product includes lower current draws and modern aesthetics design which reduces installation times and maximizes profit. In addition, the Triga audible visible notification products offers white and red plastic housings, and wall and ceiling mounting options.

The entire Triga product line of ceiling-mount strobes and horn strobes include a variety of features that increase their application versatility while simplifying installation. All devices feature a plug-in design with minimal intrusion into the back box, making installations fast and foolproof while virtually eliminating costly and time consuming ground faults.

To simplify installation, the Triga utilizes a universal mounting plate so installers can mount them to a wide array of back boxes. With an onboard shorting spring, installers can test wiring continuity before the device is installed.

Installers can also easily adapt devices to suit a wide range of application requirements using field-selectable candela settings, automatic selection of 12- or 24- volt operation, and a rotary switch for horn tones with two volume selections.

FEATURES & BENEFITS

- Listed for ceiling mounting only
- Features a plug-in design with minimal intrusion into the back box
- Designed with tamper-resistant construction
- Rotary switch for horn tone and two volume selections
- Tamper-resistant construction
- Includes a universal mounting plate for ceiling units
- Produces horn rated at 88+ dBA at 16 volts
- Rotary switch for horn tone and two volume selections
- Automatic selection of 12- or 24-volt operation at 15 and 30 candela
- Field-selectable candela settings on ceiling units: 15, 30, 75, 95, 115, 150, 177
- Contains a mounting plate with a shorting spring feature checks wiring continuity before device installation
- Compatible with System Sensor synchronization protocol
- Supports electrically Compatible with legacy SpectrAlert and SpectrAlert Advance devices

TRIGA SPECIFICATIONS ARCHITECT / ENGINEER SPECIFICATIONS

GENERAL

Triga ceiling-mount strobes and horn strobes shall mount to a standard 4 × 4 × 1½-inch back box, 4-inch octagon back box, or doublegang back box. Two-wire products shall also mount to a single-gang 2 × 4 × 1 7/8-inch back box. A universal mounting plate shall be used for mounting ceiling and wall products. The notification appliance circuit wiring shall terminate at the universal mounting plate. Also, Triga products, when used with the Sync • Circuit™ Module accessory, shall be powered from a non-coded notification appliance circuit output and shall operate on a nominal 12 or 24 volts. When used with the Sync • Circuit Module, 12-volt-rated notification appliance circuit outputs shall operate between 8.5 and 17.5 volts; 24-volt-rated notification appliance circuit outputs shall operate between 16.5 and 33 volts. Indoor L-Series products shall operate between 32 and 120 degrees Fahrenheit from a regulated DC or full-wave rectified unfiltered power supply. Ceiling strobes and horn strobes shall have field-selectable candela settings including 15, 30, 75, 95, 115, 150, and 177.

STROBE

The strobe shall be a Triga Model _____ listed to UL 1971 and shall be approved for fire protective service. The strobe shall be wired as a primary-signaling notification appliance and comply with the Americans with Disabilities Act requirements for visible signaling appliances, flashing at 1 Hz over the strobe's entire operating voltage range. The strobe light shall consist of a xenon flash tube and associated lens/reflector system.

HORN STROBE COMBINATION

The horn strobe shall be a Triga Model _____ listed to UL 1971 and UL 464 and shall be approved for fire protective service. The horn strobe shall be wired as a primary-signaling notification appliance and comply with the Americans with Disabilities Act requirements for visible signaling appliances, flashing at 1 Hz over the strobe's entire operating voltage range. The strobe light shall consist of a xenon flash tube and associated lens/reflector system. The horn shall have two audibility options and an option to switch between a temporal three pattern and a non-temporal (continuous) pattern. These options are set by a multiple position switch. The horn on horn strobe models shall operate on a coded or non-coded power supply.

SYNCHRONIZATION MODULE

The module shall be a System Sensor Sync • Circuit model MDL3 listed to UL 464 and shall be approved for fire protective service. The module shall synchronize SpectrAlert strobes at 1 Hz and horns at temporal three. Also, while operating the strobes, the module shall silence the horns on horn strobe models over a single pair of wires. The module shall mount to a 4 11/16 × 4 11/16 × 2 1/8 inch back box. The module shall also control two Style Y (class B) circuits or one Style Z (class A) circuit. The module shall synchronize multiple zones. Daisy chaining two or more synchronization modules together will synchronize all the zones they control. The module shall not operate on a coded power supply.

PHYSICAL

Ceiling-Mount Dimensions (including lens): 6.8" diameter × 2.5"H (173 mm diameter × 64 mm high) **Ceiling-Mount Surface Mount Back Box Skirt Dimensions (SBBWR, SBBW):** 6.9" diameter × 3.4"H (175 mm diameter × 86 mm)

ELECTRICAL

Nominal Voltage: Regulated 12 DC or regulated 24 DC/FWR1 **Operating Voltage Range 2:** 8 to 17.5 V (12 V nominal) or 16 to 33 V (24 V nominal) **Operating Voltage Range MDL3 Sync Module:** 8.5 to 17.5 V (12 V nominal) or 16.5 to 33 V (24 V nominal) **Input Terminal Wire Gauge:** 12 to 18 AWG

ENVIRONMENTAL

Standard Operating Temperature: 32°F to 120°F (0°C to 49°C) **Humidity Range:** 10 to 93% non-condensing

AGENCY LISTINGS AND APPROVALS

UL: Listed

Notes:

Full Wave Rectified (FWR) voltage is a non-regulated, time-varying power source that is used on some power supply and panel outputs.
